## Description

There is a proprietary tech pattern in our products that stimulate neuropoints in the bottom of the foot, creating 'homeostasis' or 'equilibrium' in the mid brain. The mid brain is responsible for automatic functions like: balance, stability, strength, power, range of motion, flexibility, mobility and so much more. The moment you touch the tech you are instantly stronger, more balanced and have better range of motion and mobility. Equilibrium is the magic bullet to a lot of pain and conditions we suffer from.
